Who I Am

PK

name: Preeti Kumar B
location: Karur, Tamilnadu
phone: +91-9092470358
degree: B.E CSE
cgpa: 7.8
status: open to offers

A detail-oriented aspiring Data Analyst with hands-on experience in SQL, Python, Excel, and data visualization tools like Power BI.

I've worked across both data analytics and full-stack development — building web applications during my internship at Star Service Solutions and completing a 6-month Intensive Data Analyst program at Pulse Technocastle.

My goal is to **transform raw data into actionable insights** that support data-driven decision-making. I'm passionate about statistical analysis, business intelligence, and continuously sharpening my analytical toolkit.

With a background in Electronics and Communication Engineering, I bring a systems-thinking mindset to every data problem I tackle — combining technical precision with a hunger to learn.

— 02 — SKILLS

Technical Stack

Programming Languages

Python · C · C++ · Java

Data & BI Tools

Excel · MySQL · Power BI · Kanban · Data Analytics

Web Technologies

HTML/CSS · CSS3 · React.js · Node.js · MongoDB · REST APIs

Tools & Platforms

GitHub · VS Code · Canva · Agile · GLSL · Tinker C++

— 03 — EDUCATION

Education

B.E., Electronics and Communication Engineering

Chettinad College of Engineering and Technology

2022 – 2026 · CGPA: 7.8

— 04 — EXPERIENCE

Internship Experience

Full-Stack Development Intern

Star Service Solutions

01/2026 – 03/2026

- Built and deployed web applications using React.js, Node.js, and MongoDB.
- Developed RESTful APIs for seamless data exchange between frontend and backend systems.

Data Analysis Intern

Pulse Technocastle

10/2025 – 03/2026

- Completed a 6-month intensive course and internship program focused on Data Analysis.
- Worked with real-world datasets applying Python, SQL, and Power BI to derive insights.

— 05 — PROJECTS

Selected Projects

01 **AMD Ryzen AI — Gaming Performance Optimizer**

Developed a hybrid rule-based optimization module to improve gaming performance and graphics rendering. Leveraged machine learning to dynamically fine-tune GPU/iGPU workloads for real-time performance gains.

`GLSL` `Python` `Numerical Precision`

02 **Tachometer using Arduino**

Implemented a digital tachometer monitoring system using Hall Effect sensors and ultrasonic sensors for speed and distance measurements. The system interfaces with low-latency sensor interfacing.

`Arduino` `Embedded Systems` `IoT` `Sensors`

03 **High Performance Architecture — MATLAB**

Implemented a digital neurophysiologic acceleration architecture in MATLAB to improve computational performance. Focused on parallel processing and hardware efficiency for computer-intensive tasks.

`MATLAB` `HPC` `Architecture Design`

04 **Object Detection & Text Recognition**

Built a vision-based computer vision pipeline for object detection and OCR. Used deep learning techniques to identify objects and extract text from images with high accuracy.

`Python` `Computer Vision` `Deep Learning` `OCR`
